SUGGESTED SOLUTION

CA FINAL NOV'19

SUBJECT- SCM & PE

Test Code - FNJ 7197

BRANCH - () (Date :)

Head Office : Shraddha, 3rd Floor, Near Chinai College, Andheri (E), Mumbai – 69.

Tel : (022) 26836666

Answer 1:

- (i) Computation of Standard Cost of Production of the Shirts per dozen as well as in total for Lot Nos. 245, 246, 247

| Lot No. | Cost per dozen (Rs.) | Dozens | Total Standard Cost (Rs.) |
|----------|----------------------|--------|------------------------------|
| 245 (UK) | 1,062 [#] | 1,700 | 18,05,400 |
| 246 (US) | 955.20* | 1,200 | 11,46,240 |
| 247 (HK) | 1,062 [#] | 1,000 | 10,62,000 |
| | | | 40,13,640 |

(1 mark)

Lot No. 245/247

| | |
|------------------------------------|--------------|
| 100% as regards to material cost | Rs. 528.00 |
| 100% as regards to conversion cost | Rs. 534.00 |
| | Rs. 1,062.00 |
| * Lot No. 246 | |
| 100% as regards to material cost | Rs. 528.00 |
| 80% as regards to conversion cost | Rs. 427.20 |
| | Rs. 955.20 |

(1 mark)

- (ii) Statement of Variation between standard quantity of material and actual quantity of material used for each lot as well as in total

| Lot Nos. | Output (In Dozens) | Std. Qty. Per Dozen (In Metre) | Total Std. Quantity (In Metres) | Total Actual Quantity (In Metres) | Variation (In Metres) |
|----------|-----------------------|--------------------------------------|---------------------------------------|---|--------------------------|
| 245 (UK) | 1,700 | 24 | 40,800 | 40,440 | 360 (F) |
| 246 (US) | 1,200 | 24 | 28,800 | 28,825 | 25(A) |
| 247 (HK) | 1,000 | 24 | 24,000 | 24,100 | 100(A) |
| | | | 93,600 | 93,365 | 235(F) |

(1 mark)

Statement of Variation between standard labour hours and actual labour hours worked for each lot as well as in total

| Lot Nos. | Output (In Dozens) | Std. Labour Hours Per Dozen | Total Std. Labour Hours | Total Actual Labour Hours | Variation (In Hours) |
|----------|-----------------------|-----------------------------------|-------------------------------|------------------------------|-------------------------|
| 245(UK) | 1,700 | 3 | 5,100 | 5,130 | 30(A) |
| 246 (US) | 1,200 | 3 | 2,880 | 2,890 | 10(A) |
| | | | (1,200 Doz × 3 Hrs. × 80%) | | |
| 247 (HK) | 1,000 | 3 | 3,000 | 2,980 | 20(F) |
| | | | 10,980 | 11,000 | 20(A) |

(1 mark)

(iii) Calculation of Variances

$$\begin{aligned}\text{Material Price Variance} &= \text{Purchase Quantity} \times (\text{Standard Price} - \text{Actual Price}) \\ &= 95,000 \text{ Metres} \times \left[\text{Rs. } 22 - \frac{\text{Rs. } 21,28,000}{95,000 \text{ Metres}} \right] \\ &= \text{Rs. } 20,90,000 - \text{Rs. } 21,28,000 \\ &= \text{Rs. } 38,000 \text{ (A)} \quad \text{(1 mark)}\end{aligned}$$

$$\begin{aligned}\text{Labour Rate Variance} &= \text{Actual Hrs.} \times (\text{Std. Rate per hour} - \text{Actual Rate per hour}) \\ &= 11,000 \text{ Hrs.} \times (\text{Rs. } 98 - \text{Rs. } 100) \\ &= \text{Rs. } 22,000 \text{ (A)} \quad \text{(1 mark)}\end{aligned}$$

Variable Overhead Efficiency Variance

$$\begin{aligned}&= \text{Std. Variable Overhead Rate per hour}^* \times (\text{Std. Hours for Actual Output} - \text{Actual Hours}) \\ &= \text{Rs. } 48 \times (10,980 \text{ Hrs.} - 11,000 \text{ Hrs.}) \\ &= \text{Rs. } 960 \text{ (A)} \quad \text{(2 marks)}\end{aligned}$$

*Standard Variable Overhead Rate per hour = 60% of Rs. 80 = Rs. 48

$$\begin{aligned}\text{Fixed Overhead Volume Variance} &= \text{Std. Fixed Overhead Rate per hour}^{**} \times \\ &\quad (\text{Std. Hrs. for Actual Output} - \text{Budgeted Hours}) \\ &= \text{Rs. } 32 \times (10,980 \text{ Hrs.} - 12,000 \text{ Hrs.}) \\ &= \text{Rs. } 32,640 \text{ (A)} \quad \text{(2 marks)}\end{aligned}$$

** Standard fixed overhead rate per hours = 40% of Rs. 80 = Rs. 32

Answer 2:

Computation of Requirements of Question

Budgeted output in units

Fixed Overhead Expenditure Variance

$$\begin{aligned}&= \text{Budgeted Fixed Overheads} - \text{Actual Fixed Overheads} \\ \rightarrow \text{Rs. } 8,000 \text{ (A)} &= \text{Budgeted Output} \times (\text{Rs. } 6 \times 5 \text{ hrs.}) - \text{Rs. } 1,58,000 \\ \rightarrow \text{Budgeted Output} &= 5,000 \text{ units} \quad \text{(1 mark)}\end{aligned}$$

Number of litres purchased

$$\text{Material Price Variance} = \text{Actual Quantity} \times (\text{Std. Price} - \text{Actual Price})$$

$$\rightarrow \text{Rs. 8,000 (F)} = \text{No. of litres purchased} \times (\text{Rs. 2} - \text{Rs. 1.95})$$

$$\rightarrow \text{No. of litres purchased} = 1,60,000 \text{ litres} \quad (2 \text{ marks})$$

Number of litres used above standard allowed

$$\text{Material Usage Variance} = \text{Standard Price} \times (\text{Standard Quantity} - \text{Actual Quantity})$$

$$\rightarrow \text{Rs. 5,000 (A)} = \text{Rs. 2} \times (\text{Standard Quantity} - 1,60,000 \text{ litres})$$

$$\rightarrow \text{Standard Quantity} = 1,57,500 \text{ litres} \quad (2 \text{ marks})$$

$$\text{No. of litres above Standard} = 1,60,000 \text{ litres} - 1,57,500 \text{ litres}$$

$$= 2,500 \text{ litres} \quad (1 \text{ mark})$$

Actual units Produced

$$\text{Labour Cost Variance} = \text{Rate Variance} + \text{Efficiency Variance}$$

$$= \text{Rs. 5,760 (A)} + \text{Rs. 2,760 (F)}$$

$$= \text{Rs. 3,000 (A)} \quad (2 \text{ marks})$$

$$\text{Labour Cost Variance} = \text{Standard Cost} - \text{Actual Cost}$$

$$\rightarrow \text{Rs. 3,000 (A)} = \text{Actual Output} \times (\text{Rs. 6} \times 5 \text{ hrs.}) - \text{Rs. 1,56,000}$$

$$\rightarrow \text{Actual Output} = 5,100 \text{ units} \quad (1 \text{ mark})$$

Actual hours worked

$$\text{Labour Efficiency Variance} = \text{Standard Rate} \times (\text{Standard Hours} - \text{Actual Hours})$$

$$\rightarrow \text{Rs. 2,760 (F)} = \text{Rs. 6} \times (5,100 \text{ units} \times 5 \text{ hrs.} - \text{Actual Hours})$$

$$\rightarrow \text{Actual Hours} = 25,040 \text{ hours} \quad (2 \text{ marks})$$

Average actual wage rate per hour

$$\text{Labour Rate Variance} = \text{Actual Hours} \times (\text{Standard Rate} - \text{Actual Rate})$$

$$\rightarrow \text{Rs. 5,760 (A)} = 25,040 \text{ hours} \times (\text{Rs. 6} - \text{Actual Rate})$$

$$\rightarrow \text{Actual Rate} = \text{Rs. 6.23 ... per hour} \quad (1 \text{ mark})$$

Answer 3:**Statement showing Reconciliation Between Budgeted [F.Y. 2015 – 16] & Actual Profit [F.Y. 2016 – 17]**

| Particulars | (Rs. in lacs) | (Rs. in lacs) |
|--------------------------------|---------------|---------------|
| Budgeted Profit | | 200.00 |
| Sales Contribution Variances : | | |

| | | |
|--------------------------------|---------------------|-----------|
| Price Volume | 427.50 (F) 25(A) | 402.50(F) |
| Direct Material Variances : | | |
| Price | 307.50(A) | |
| Usage | 150.00 (A) | 457.50(A) |
| Variable Overheads Variances : | | |
| Expenditure | 25.00 (A) | |
| Efficiency | 25.00 (A) | 50.00 (A) |
| Fixed Overheads Variances : | | |
| Expenditure | 67.50 (A) | |
| Volume | N.A. | 67.50 (A) |
| Actual Profit | | 27.50 |

(1 mark)

Computation of Variances (Rs. In Lacs)

Sales Variances (W.N.1)

Price Variance = Actual Sales – Standard Sales
= Rs. 3,277.50 – Rs. 2,850.00
= Rs. 427.50 (F)

(1 mark)

Volume Variance = Standard Sales - Budgeted Sales
= Rs. 2,850.00 – Rs. 3,000.00
= Rs. 150 (A)

(1 mark)

Sales Contribution Variances

Sales Contribution = Sales Price Variance

Price Variance = Rs. 427.50(F)

Sales Contribution = Sales Volume Variance × Budgeted PV Ratio

Volume Variance = Rs. 150 (A) × $\left(\frac{Rs.200+Rs.300}{Rs.3,000}\right)$

= Rs. 25 (A)

(1 mark)

Material Variance (W.N.2)

Material Price Variance = Standard Cost of Actual Quantity – Actual Cost

= Rs. 2,050.00 – Rs. 2,357.50

= Rs. 307.50(A)

(1 mark)

Material Usage Variance

= Standard Cost of Standard Quantity for Actual Output –
Standard Cost of Actual Quantity

= Rs. 1900 – Rs. 2050

$$= \text{Rs. 150(A)} \quad (1 \text{ mark})$$

Variable Overhead Variances (W.N.3)

Expenditure Variance

$$= \text{Budgeted Variable Overheads for Actual Hours} - \text{Actual Variable Overheads}$$

OR

$$= \text{Std. Rate per unit} \times \text{Expected Output for Actual Hours Worked} - \text{Actual Variable Overheads}$$

$$= \text{Rs. 500} - \text{Rs. 525}$$

$$= \text{Rs. 25(A)} \quad (1 \text{ mark})$$

Efficiency Variances

$$= \text{Standard Variable Overheads for Production} - \text{Budgeted variable Overheads for Actual hours}$$

OR

$$= \text{Std. Rate per unit} \times \text{Actual Output} - \text{Std. Rate per unit} \times \text{Expected Output for Actual Hours Worked}$$

$$= \text{Rs. 475} - \text{Rs. 500}$$

$$= \text{Rs. 25(A)} \quad (1 \text{ mark})$$

Fixed Overhead Variances (W.N. 4)

$$\text{Expenditure Variance} = \text{Budgeted Fixed Overheads} - \text{Actual Fixed Overheads.}$$

$$= \text{Rs. 300.00} - \text{Rs. 367.50}$$

$$= \text{Rs. 67.50 (A)} \quad (1 \text{ mark})$$

Working Notes (Rs. in lacs)

Note – 1 :

| | |
|--|----------|
| Sales in F.Y. 2016 – 2017 | 3,277.50 |
| Less : Increase due to price rise [Rs. 3,277.50 lacs × 15/115] | 427.50 |
| Sales in F.Y. 2016 – 2017 at F.Y. 2015 – 2016 Prices [Standard Sales] | 2,850.00 |
| Sales in F.Y. 2015 – 2016 | 3,000.00 |
| Fall in Sales in F.Y. 2016 – 2017 [Rs, 3,000 lacs – Rs. 2,850 lacs] | 150.00 |
| Percentage fall | 5% |

(1 mark)

Note – 2 :

| | |
|---|----------|
| Material Cost in F.Y. 2015 – 16 | 2,000.00 |
| Less : 5% for Decrease in Volume | 100.00 |
| 'Standard Material Usage' at F.Y. 2015 – 16 Prices (Standard Cost of Standard Quantity for Actual output) | 1,900.00 |
| Actual Material Cost F.Y. 2016 – 2017 | 2,357.50 |
| Less : 15% Increase in Prices [Rs. 2,357.50 lakhs × 15/115] | 307.50 |

| | |
|---|---------|
| Actual Materials Used, at F.Y. 2015 – 2016 Prices (Standard Cost of Actual Quantity) | 2,050.0 |
|---|---------|

(1 mark)

Note – 3 :

| | |
|---|---------------|
| Variable Overheads Cost in F.Y. 2015 – 16 | 500.00 |
| Less 5% due to fall in Volume of Sales in F.Y. 2016 – 17 | 25.00 |
| “Standard Overheads for Production” in F.Y. 2016 – 17 | 475.00 |
| Actual Variable Overheads Incurred in F.Y. 2016 – 17 | 525.00 |
| Less : 5% for Increase in Price [Rs. 525 lacs × 5 / 105] | 25.00 |
| Amount Spent in F.Y. 2016 – 17 at F.Y. 2015 – 16 Prices (Budgeted Variable Overheads for Actual Hours) | 500.00 |

(1 mark)

Answer 4:

(i) **COMPUTATION OF VARIANCES**

$$\begin{aligned} \text{Material Usage Variance} &= \text{Standard Price} \times (\text{Standard Quantity} - \text{Actual Quantity}) \\ &= \text{Rs.4.00} \times (18,000^* \text{ Kgs.} - 20,000 \text{ Kgs.}) \\ &= \text{Rs. 8,000 (A)} \end{aligned}$$

$$= *[1800 \text{ units} \times (20000 \text{ kgs.} / 2000 \text{ units})]$$

$$\begin{aligned} \text{Labour Efficiency Variance} &= \text{Standard Rate} \times (\text{Standard Hours} - \text{Actual Hours}) \\ &= \text{Rs.8.00} \times (14,400^* \text{ hrs.} - 14,800 \text{ hrs.}) \\ &= \text{Rs.3,200 (A)} \\ &= *[1800 \text{ units} \times (16000 \text{ hrs.} / 2000 \text{ units})] \end{aligned}$$

Variable Overhead Efficiency Variance

$$\begin{aligned} &= \text{Standard Variable Overheads for Production} - \\ &\quad \text{Budgeted Variable Overheads for Actual hours} \\ &= (14,400 \text{ hrs.} \times \text{Rs.3.00}) - (\text{Rs.3.00} \times 14,800 \text{ hrs.}) \\ &= \text{Rs.1,200 (A)} \end{aligned}$$

Fixed Overhead Volume Variance

$$\begin{aligned} &= \text{Absorbed Fixed Overheads} - \text{Budgeted Fixed Overheads} \\ &= (14,400 \text{ hrs.} \times \text{Rs.3.00}) - (16,000 \text{ hrs.} \times \text{Rs.3.00}) \\ &= \text{Rs.4,800 (A)} \end{aligned}$$

Sales Margin Volume Variance = Standard Margin – Budgeted Margin

$$\begin{aligned} &= (1,800 \text{ units} \times \text{Rs.56.00}) - (2,000 \text{ units} \times \text{Rs.56.00}) \\ &= \text{Rs.11,200 (A)} \end{aligned}$$

Sales Contribution Volume Variance

$$\begin{aligned} &= \text{Standard Contribution} - \text{Budgeted Contribution} \\ &= (1,800 \text{ units} \times \text{Rs.80.00}) - (2,000 \text{ units} \times \text{Rs.80.00}) \\ &= \text{Rs.16,000 (A)} \end{aligned}$$

(6 marks)

“Statement Showing “Reconciliation Between Budgeted Profit & Actual Profit”

| Particulars | Conventional Method (Rs.) | Relevant Cost Method (Rs.) | | |
|--|---------------------------|----------------------------|-----------------|------------------|
| | | Scarce Material | Scarce Labour | No Scarce Inputs |
| Budgeted Profit (2,000 units × Rs.56) | 1,12,000 | 1,12,000 | 1,12,000 | 1,12,000 |
| Sales Volume Variance | 11,200 (A) | NIL* | 12,000\$ (A) | 16,000 (A) |
| Material Usage Variance | 8,000 (A) | 24,000 (A) | 8,000 (A) | 8,000 (A) |
| Labour Efficiency Variance | 3,200 (A) | 3,200 (A) | 7,200 (A) | 3,200 (A) |
| Variable Overhead Efficiency Variance | 1,200 (A) | 1,200 (A) | 1,200 (A) | 1,200 (A) |
| Fixed Overhead Volume Variance | 4,800 (A) | N.A.# | N.A. # | N.A. # |
| Actual Profit | 83,600 | 83,600 | 83,600 | 83,600 |

(3 marks)

NOTES

Scarce Material

Based on conventional method, direct material usage variance is Rs.8,000 (A) i.e. 2,000 Kg. × Rs.4. In this situation material is scarce, and, therefore, material cost variance based on relevant cost method should also include contribution lost per unit of material. Excess usage of 2,000 Kg. leads to lost contribution of Rs.16,000 i.e. 2,000 Kgs. × Rs.8. **Total material usage variance based on relevant cost method, when material is scarce will be:**

Rs.8,000 (A) + Rs.16,000 (A) = Rs.24,000 (A). Since labour is not scarce, labour variances are identical to conventional method.

Excess usage of 2,000 Kgs. leads to loss of contribution from 200 units i.e. Rs.16,000 (200 units × Rs.80). It is not the function of the sales manager to use material efficiently. Hence, loss of contribution from 200 units should be excluded while computing sales contribution volume variance.

(*)→

Therefore, sales contribution volume variance, when materials are scarce will be NIL i.e. Rs.16,000 (A) - Rs.16,000 (A).

Scarce Labour

Material is no longer scarce, and, therefore, the direct material variances are same as in conventional method. In conventional method, excess labour hours used are: 14,400 hrs. – 14,800 hrs. = 400 hrs. Contribution lost per hour = Rs.10. Therefore, total contribution lost, when labour is scarce will be: 400 hrs. × Rs.10 = Rs.4,000. **Therefore, total labour efficiency variance, when labour hours are scarce will be Rs.7,200 (A) i.e. Rs.3,200 (A) + Rs.4,000 (A).**

Excess usage of 400 hrs. leads to loss of contribution from 50 units i.e. Rs.4,000 (50 units × Rs.80). It is not the function of the sales manager to use labour hours efficiently. Hence, loss of contribution from 50 units should be excluded while computing sales contribution volume Variance.

(\$)-→

Therefore, sales contribution volume variance, when labour hours are Scarce will be Rs.12,000 (A) i.e. Rs.16,000 (A) - Rs.4,000 (A).

Fixed Overhead Volume Variance

(#) →

The fixed overhead volume variance does not arise in marginal costing system. In absorption costing system, it represents the value of the under or over absorbed fixed overheads due to change in production volume. When marginal costing is in use there is no overhead volume variance, because marginal costing does not absorb fixed overheads.

(ii) Comment on Efficiency and Responsibility of the Sales Manager

In general, Gross Profit (or contribution margin) is the joint responsibility of sales managers as well as of production managers. *On one hand the sales manager is responsible for the sales revenue part, on the other hand the production manager is accountable for the cost - of-goods-sold component.* However, it is the top management who needs to ensure that the target profit is achieved by the organization. *The sales manager is accountable for prices, volume, and mix of the product, whereas the production manager must control the costs of materials, labour, factory overheads and quantities of production. The purchase manager must purchase materials at budgeted prices. The personnel manager must employ right people at the right place with appropriate wage rates.* The internal audit manager must ensure that the budgetary figures for sales and costs are being adhered by all departments which are directly or indirectly involved in contribution of making profit. Thus, sales manager is not responsible for contribution lost due to excess usage or inefficient usage of resources in case of scarce resources. Hence, such contribution lost must be excluded from the sales contribution volume variance. **(3 marks)**

Answer 5:

Deliberate action of cutting price to increase sales volume indicates that firm is intending to expand its market to retail market and street shops which is price sensitive.

Purchase Price Variance is clearly indicating that firm has purchased raw material at lower price which may be due to buying of lower quality of material. Similarly positive Efficiency Variance is indicating cost cutting and stretching resources.

It appears that firm is intending to expand its market to retail market and street shops by not only reducing the price but also compromising its quality which is opposing its current strategy of high quality.

Management should monitor the trends of variances on regular basis and take appropriate action in case of evidence of permanent decline in quality. Here, customer feedback is also very important. **(4 marks)**
