SUGGESTED SOLUTION
INTERMEDIATE N' 2018 EXAM

SUBJECT- AUDITING

Test Code –PIN 5009

Date: 02.09.2018

Head Office :Shraddha, 3rd Floor, Near Chinai College, Andheri (E), Mumbai – 69.

Tel : (022) 26836666

ANSWER-1

(2 MARKS X 10= 20 MARKS)

ANSWER-A

Correct : As per SA 200 "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Standards on Auditing," the auditor is not expected to, and cannot, reduce audit risk to zero and cannot therefore obtain absolute assurance that the financial statements are free from material misstatement due to fraud or error. This is because there are inherent limitations of an audit, which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive.

ANSWER B

Incorrect : as per AS 1, " Disclosure of Accounting Policies," specific disclosure of the fundamental accounting assumption is required if they are not followed in the financial statements.

ANSWER C

Correct. Once the overall audit strategy has been established, an audit plan can be developed to address the various matters identified in the overall audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. The establishment of the overall audit strategy and the detailed audit plan are not necessarily discrete or sequential processes, but are closely inter – related since changes in one may result in consequential changes to the other.

Answer : D

Incorrect : Materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures) may need to be revised as a result of a change in circumstances that occurred during the audit (for example, a decision to dispose of a major part of the entity's business), new information, or a change in the auditor's understanding of the entity and its operations as a result of performing further audit procedures.

Answer : E

Incorrect : As per SA 230 on "Audit Documentation" the working papers are the property of the auditor and the auditor has right to retain them. He may at his discretion can make available working papers to his client. The auditor should retain them long enough to meet the needs of his practice and legal or professional requirement.

Answer : F

Internal evidence is the evidence that originates within the client's organization. Since purchase invoice originates outside the client's organization, therefore, it is an example of external evidence.

Answer : G

Incorrect : Section 138 of the Companies Act, 2013 requires every private company to appoint an internal auditor having turnover of Rs. 200 crore or more during the preceding financial year; or outstanding loans or borrowings from banks or public financial institutions exceeding Rs. 100 crore or more at any point of time during the preceding financial year.

Answer : H

Incorrect : The management is responsible for maintaining an adequate accounting system incorporating various internal controls to the extent appropriate to the size and nature of the business. Maintenance of Internal Control System is responsibility of management because the internal control is the process designed, implemented and maintained by those charged with governance/ management to provide reasonable assurance about the achievement of entity's objectives.

Answer : I

Incorrect : The auditor shall express an unmodified opinion when the auditor concludes that the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.

Answer : J

Correct : The auditor shall express an adverse opinion when the auditor, having obtained sufficient appropriate audit evidence, concludes that misstatements, individually or in the aggregate, are both material and pervasive to the financial statements.

ANSWER-2**ANSWER-A**

The auditor should plan his work to enable him to conduct an effective audit in an efficient and timely manner. Plans should be based on knowledge of the client's business.

Plans should be made to cover, among other things:

- (a) Acquiring knowledge of the client's accounting systems, policies and internal control procedures;
- (b) Establishing the expected degree of reliance to be placed on internal control;
- (c) determining and programming the nature, timing, and extent of the audit procedures to be performed;and
- (d) coordinating the work to be performed.

ANSWER-B

External confirmation procedures frequently are relevant when addressing assertions associated with account balances and their elements, but need not be restricted to these items. For example, the auditor may request external confirmation of the terms of agreements, contracts, or transactions between an entity and other parties. External confirmation procedures also may be performed to obtain audit evidence about the absence of certain conditions. For example, a request may specifically seek confirmation that no "side agreement" exists that may be relevant to an entity's revenue cut-off assertion. Other situations where external confirmation procedures may provide relevant audit evidence in

responding to assessed risks of material misstatement include:

- Bank balances and other information relevant to banking relationships.
- Accounts receivable balances and terms.
- Inventories held by third parties at bonded warehouses for processing or on consignment.
- Property title deeds held by lawyers or financiers for safe custody or as security.
- Investments held for safekeeping by third parties, or purchased from stock brokers but not delivered at the balance sheet date.
- Amounts due to lenders, including relevant terms of repayment and restrictive covenants.
- Accounts payable balances and terms.

ANSWER-C

Responsibilities for the Financial Statements: The auditor's report shall include a section with a heading "Responsibilities of Management for the Financial Statements."

SA 200 explains the premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit in accordance with SAs is conducted. Management and, where appropriate, those charged with governance accept responsibility for the preparation of the financial statements. Management also accepts responsibility for such internal control as it determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The description of management's responsibilities in the auditor's report includes reference to both responsibilities as it helps to explain to users the premise on which an audit is conducted.

This section of the auditor's report shall describe management's responsibility for:

- Preparing the financial statements** in accordance with the applicable financial reporting framework, **and for such internal control** as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; [because of the possible effects of fraud on other aspects of the audit, materiality does not apply to management's acknowledgement regarding its responsibility for the design, implementation, and maintenance of internal control (or for establishing and maintaining effective internal control over financial reporting) to prevent and detect fraud.] and
- Assessing the entity's ability to continue as a going concern** and whether the use of the going concern basis of accounting is appropriate as well as disclosing, if applicable, matters relating to going concern. The explanation of management's responsibility for this assessment shall include a description of when the use of the going concern basis of accounting is appropriate.

ANSWER-D

Acceptance of a Change in Engagement: An auditor who, before the completion of the engagement, is requested to change the engagement to one which provides a lower level of assurance, should consider the appropriateness of doing so.

A request from the client for the auditor to change the engagement may result from a change in circumstances affecting the need for the service, a misunderstanding as to the nature of an audit or related service originally requested or a restriction on the scope of the engagement, whether imposed by management or caused by circumstances. The auditor would consider carefully the reason given for the request, particularly the implications of a restriction on the scope of the engagement, especially any legal or contractual implications.

If the auditor concludes that there is reasonable justification to change the engagement and if the audit work performed complied with the SAs applicable to the changed engagement, the report issued would be appropriate for the revised terms of engagement. In order to avoid confusion, the report would not include reference to-

- (i) the original engagement; or
- (ii) any procedures that may have been performed in the original engagement, except where the engagement is changed to an engagement to undertake agreed-upon procedures and thus reference to the procedures performed is a normal part of the report.

The auditor should not agree to a change of engagement where there is no reasonable justification for doing so.

If the terms of the audit engagement are changed, the auditor and management shall agree on and record the new terms of the engagement in an engagement letter or other suitable form of written agreement.

If the auditor is unable to agree to a change of the terms of the audit engagement and is not permitted by management to continue the original audit engagement, the auditor shall-

- (i) Withdraw from the audit engagement where possible under applicable law or regulation; and
- (ii) Determine whether there is any obligation, either contractual or otherwise, to report the circumstances to other parties, such as those charged with governance, owners or regulators.

ANSWER-3

ANSWER-A

Information which assist the Auditor in accepting and continuing of relationship with Client:

As per SA 220, "Quality Control for an Audit of Financial Statements" the auditor should obtain information considered necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement and when considering acceptance of a new engagement with an existing client. The following information would assist the auditor in accepting and continuing of relationship with the client:

- (i) The integrity of the principal owners, key management and those charged with governance of the entity;
- (ii) Whether the engagement team is competent to perform the audit engagement and has the necessary capabilities, including time and resources;
- (iii) Whether the firm and the engagement team can comply with relevant ethical requirements;

and

- (iv) Significant matters that have arisen during the current or previous audit engagement, and their implications for continuing the relationship.

ANSWER-B

Communicating key audit matters in the auditor's report is not:

- (i) A substitute for disclosures in the financial statements that the applicable Financial reporting framework requires management to make, or that are otherwise necessary to achieve fair presentation;
- (ii) A substitute for the auditor expressing a modified opinion when required by the circumstances of a specific audit engagement in accordance with SA705 (Revised);
- (iii) A substitute for reporting in accordance with SA 570 when a material uncertainty exists relating to events or conditions that may cast significant doubt on an entity's ability to continue as a going concern; or
- (iv) A separate opinion on individual matters.

ANSWER-C

Control Environment – Component of Internal Control: The auditor shall obtain an understanding of the control environment. As part of obtaining this understanding, the auditor shall evaluate whether:

- (i) Management has created and maintained a culture of honesty and ethical behavior; and
- (ii) The strengths in the control environment elements collectively provide an appropriate foundation for the other components of internal control.

What is included in Control Environment?

The control environment includes:

- (i) the governance and management functions and
- (ii) the attitudes, awareness, and actions of those charged with governance and management.
- (iii) The control environment sets the tone of an organization, influencing the control consciousness of its people.

Elements of the Control Environment: Elements of the control environment that may be relevant when obtaining an understanding of the control environment include the following:

- (a) **Communication and enforcement of integrity and ethical values** – These are essential elements that influence the effectiveness of the design, administration and monitoring of controls.
- (b) **Commitment to competence** – Matters such as management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.
- (c) **Participation by those charged with governance** – Attributes of those charged with governance such as:

- ◆ Their independence from management.
 - ◆ Their experience and stature.
 - ◆ The extent of their involvement and the information they receive, and the scrutiny of activities.
 - ◆ The appropriateness of their actions, including the degree to which difficult questions are raised and pursued with management, and their interaction with internal and external auditors.
- (d) Management's philosophy and operating style – Characteristics such as management's:**
- ◆ Approach to taking and managing business risks.
 - ◆ Attitudes and actions toward financial reporting.
 - ◆ Attitudes toward information processing and accounting functions and personnel.
- (e) Organizational structure** – The framework within which an entity's activities for achieving its objectives are planned, executed, controlled, and reviewed.
- (f) Assignment of authority and responsibility** - Matters such as how authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established.
- (g) Human resource policies and practices** – Policies and practices that relate to, for example, recruitment, orientation, training, evaluation, counselling, promotion, compensation, and remedial actions.

ANSWER-D

The form, content and extent of audit documentation depend on factors such as:

1. The size and complexity of the entity.
2. The nature of the audit procedures to be performed.
3. The identified risks of material misstatement.
4. The significance of the audit evidence obtained.
5. The nature and extent of exceptions identified.
6. The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or audit evidence obtained.
7. The audit methodology and tools used.

ANSWER-4

ANSWER-A

The firm's system of quality control should include policies and procedures addressing each of the following elements:

- (e) Leadership responsibilities for quality within the firm.
- (f) Ethical requirements.
- (g) Acceptance and continuance of client relationships and specific engagements.

- (h) Human resources.
- (i) Engagement performance.
- (j) Monitoring.

ANSWER-B

The auditor shall assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis after the date of the auditor's report.

SQC 1 "Quality Control for Firms that perform Audits and Review of Historical Financial Information, and other Assurance and related services", requires firms to establish policies and procedures for the timely completion of the assembly of audit files. An appropriate time limit within which to complete the assembly of the final audit file is ordinarily not more than 60 days after the date of the auditor's report.

The completion of the assembly of the final audit file after the date of the auditor's report is an administrative process that does not involve the performance of new audit procedures or the drawing of new conclusions. Changes may, however, be made to the audit documentation during the final assembly process, if they are administrative in nature.

Examples of such changes include:

- ◆ Deleting or discarding superseded documentation.
- ◆ Sorting, collating and cross referencing working papers.
- ◆ Signing off on completion checklists relating to the file assembly process.
- ◆ Documenting audit evidence that the auditor has obtained, discussed and agreed with the relevant members of the engagement team before the date of the auditor's report.

After the assembly of the final audit file has been completed, the auditor shall not delete or discard audit documentation of any nature before the end of its retention period.

SQC 1 requires firms to establish policies and procedures for the retention of engagement documentation. The retention period for audit engagements ordinarily is no shorter than seven years from the date of the auditor's report, or, if later, the date of the group auditor's report.

ANSWER-C

While obtaining audit evidence about the effective operation of internal controls, the auditor considers how they were applied, the consistency with which they were applied during the period and by whom they were applied. The concept of effective operation recognises that some deviations may have occurred. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions and human error. When deviations are detected the auditor makes specific inquiries regarding these matters, particularly, the timing of staff changes in key internal control functions. The auditor then ensures that the tests of control appropriately cover such a period of change or fluctuation.

Based on the results of the tests of control, the auditor should evaluate whether the internal controls are designed and operating as contemplated in the preliminary assessment of control risk. The evaluation of deviations may result in the auditor concluding that the assessed level of control risk needs to be revised. In such cases, the auditor would modify the nature, timing and extent of planned substantive procedures.

Before the conclusion of the audit, based on the results of substantive procedures and other audit evidence obtained by the auditor, the auditor should consider whether the assessment of control risk is confirmed. In case of deviations from the prescribed accounting and internal control systems, the auditor would make specific inquiries to consider their implications. Where, on the basis of such inquiries, the auditor concludes that the deviations are such that the preliminary assessment of control risk is not supported, he would amend the same unless the audit evidence obtained from other tests of control supports that assessment. Where the auditor concludes that the assessed level of control risk needs to be revised, he would modify the nature, timing and extent of his planned substantive procedures.

It has been suggested that actual operation of the internal control should be tested by the application of procedural tests and examination in depth. Procedural tests simply mean testing of the compliance with the procedures laid down by the management in respect of initiation, authorisation, recording and documentation of transaction at each stage through which it flows.

ANSWER-D

As per SA 701, "Communicating Key Audit Matters in the Auditor's Report", the purpose of communicating key audit matters is to enhance the communicative value of the auditor's report by providing greater transparency about the audit that was performed. Communicating key audit matters provides additional information to intended users of the financial statements to assist them in understanding those matters that, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. Communicating key audit matters may also assist intended users in understanding the entity and areas of significant management judgment in the audited financial statements.

ANSWER-5

ANSWER-A

Evaluations by the Auditor

The auditor shall evaluate whether the financial statements are prepared in accordance with the requirements of the applicable financial reporting framework.

This evaluation shall include consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments.

Qualitative Aspects of the Entity's Accounting Practices

1. Management makes a number of judgments about the amounts and disclosures in the financial statements.

2. SA 260 (Revised) contains a discussion of the qualitative aspects of accounting practices.
3. In considering the qualitative aspects of the entity's accounting practices, the auditor may become aware of possible bias in management's judgments. The auditor may conclude that lack of neutrality together with uncorrected misstatements causes the financial statements to be materially misstated. Indicators of a lack of neutrality include the following:
 - (i) The selective correction of misstatements brought to management's attention during the audit

Example

✍ Correcting misstatements with the effect of increasing reported earnings, but not correcting misstatements that have the effect of decreasing reported earnings.

✍ The combination of several deficiencies affecting the same significant account or disclosure (or the same internal control component) could amount to a significant deficiency (or material weakness if required to be communicated in the jurisdiction). This evaluation requires judgment and involvement of audit executives.

- (ii) Possible management bias in the making of accounting estimates.

4. SA540 addresses possible management bias in making accounting estimates.

Indicators of possible management bias do not constitute misstatements for purposes of drawing conclusions on the reasonableness of individual accounting estimates. They may, however, affect the auditor's evaluation of whether the financial statements as a whole are free from material misstatement.

ANSWER-B

The auditor can formulate his entire audit programme only after he has had a satisfactory understanding of the internal control systems and their actual operation. If he does not care to study this aspect, it is very likely that his audit programme may become unwieldy and unnecessarily heavy and the object of the audit may be altogether lost in the mass of entries and vouchers. It is also important for him to know whether the system is actually in operation. Often, after installation of a system, no proper follow up is there by the management to ensure compliance. The auditor, in such circumstances, may be led to believe that a system is in operation which in reality may not be altogether in operation or may at best operate only partially. This state of affairs is probably the worst that an auditor may come across and he would be in the midst of confusion, if he does not take care.

It would be better if the auditor can undertake the review of the internal control system of client. This will give him enough time to assimilate the controls and implications and will enable him to be more objective in the framing of the audit programme. He will also be in a position to bring to the notice of the management the weaknesses of the system and to suggest measures for improvement. At a further interim date or in the course of the audit, he may ascertain how far the weaknesses have been removed.

From the foregoing, it can be concluded that the extent and the nature of the audit programme is substantially influenced by the internal control system in operation. In deciding upon a plan of test checking, the existence and operation of internal control system is of great significance.

A proper understanding of the internal control system in its content and working also enables an auditor to decide upon the appropriate audit procedure to be applied in different areas to be covered in the audit programme.

In a situation where the internal controls are considered weak in some areas, the auditor might choose an auditing procedure or test that otherwise might not be required; he might extend certain tests to cover a large number of transactions or other items than he otherwise would examine and at times he may perform additional tests to bring him the necessary satisfaction.

ANSWER-C

The relationship between auditing and law is very close one. Auditing involves examination of various transactions from the view point of whether or not these have been properly entered into. It necessitates that an auditor should have a good knowledge of business laws affecting the entity. He should be familiar with the law of contracts, negotiable instruments, etc. The knowledge of taxation laws is also inevitable as entity is required to prepare their financial statements taking into account various provisions affected by various tax laws. In analysing the impact of various transactions particularly from the accounting aspect, an auditor ought to have a good knowledge about the direct as well as indirect tax laws.

ANSWER-D

Tests of controls: Test of controls may be defined as an audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

The auditor shall design and perform tests of controls to obtain sufficient appropriate audit evidence as to the operating effectiveness of relevant controls when:

- (a) The auditor's assessment of risks of material misstatement at the assertion level includes an expectation that the controls are operating effectively (i.e., the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures); or
- (b) Substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level.

A higher level of assurance may be sought about the operating effectiveness of controls when the approach adopted consists primarily of tests of controls, in particular where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.

ANSWER-6

ANSWER-A

The decision regarding which type of modified opinion is appropriate depends upon :

- (a) The nature of the matter giving rise to the modification, that is, whether the financial statements are materially misstated or, in the case of an inability to obtain sufficient appropriate audit evidence, may be materially misstated; and
- (b) The auditor's judgment about the pervasiveness of the effects or possible effects of the matter on the financial statements.

The table below illustrates how the auditor's judgment about the nature of the matter giving rise to the modification, and the pervasiveness of its effects or possible effects on the financial statements, affects the type of opinion to be expressed.

Nature of Matter Giving Rise to the Modification	Auditor's Judgement about the Pervasiveness of the Effects or Possible Effects on the Financial Statements	
	Material but Not Pervasive	Material and Pervasive
Financial statements are materially misstated	Qualified opinion	Adverse opinion
Inability to obtain sufficient appropriate audit evidence	Qualified opinion	Disclaimer of opinion

ANSWER-B

Irrespective of the assessed risks of material misstatement, the auditor shall design and perform substantive procedures for each material class of transactions, account balance, and disclosure.

1. This requirement reflects the facts that:
 - (i) the auditor's assessment of risk is judgmental and so may not identify all risks of material misstatement; and
 - (ii) there are inherent limitations to internal control, including management override.
2. Depending on the circumstances, the auditor may determine that:
 - Performing only substantive analytical procedures will be sufficient to reduce audit risk to an acceptably low level. For example, where the auditor's assessment of risk is supported by audit evidence from tests of controls.
 - Only tests of details are appropriate.
 - A combination of substantive analytical procedures and tests of details are most responsive to the assessed risks.
3. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. SA 520, "Analytical Procedures" establishes requirements and provides guidance on the application of analytical procedures during an audit.
4. The nature of the risk and assertion is relevant to the design of tests of details. For example,

tests of details related to the existence or occurrence assertion may involve selecting from items contained in a financial statement amount and obtaining the relevant audit evidence. On the other hand, tests of details related to the completeness assertion may involve selecting from items that are expected to be included in the relevant financial statement amount and investigating whether they are included.

5. Because the assessment of the risk of material misstatement takes account of internal control, the extent of substantive procedures may need to be increased when the results from tests of controls are unsatisfactory.
6. In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size. However, other matters are also relevant, including whether it is more effective to use other selective means of testing.

ANSWER-C

Auditors' Responsibility for Reporting on Internal Financial Controls over Financial Reporting in India

Clause (i) of Sub-section 3 of Section 143 of the Act requires the auditors' report to state whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

It may be noted that auditor's reporting on internal financial controls is a requirement specified in the Act and, therefore, will apply only in case of reporting on financial statements prepared under the Act and reported under Section 143.

Accordingly, reporting on internal financial controls will not be applicable with respect to interim financial statements, such as quarterly or half-yearly financial statements, unless such reporting is required under any other law or regulation.

Objectives of an auditor in an audit of internal financial controls over financial reporting: The auditor's objective in an audit of internal financial controls over financial reporting is, "to express an opinion on the effectiveness of the company's internal financial controls over financial reporting." It is carried out along with an audit of the financial statements.

Reporting under Section 143(3)(i) is dependent on the underlying criteria for internal financial controls over financial reporting adopted by the management. However, any system of internal controls provides only a reasonable assurance on achievement of the objectives for which it has been established. Also, the auditor shall use the concept of materiality in determining the extent of testing such controls.

Rule 8(5)(viii) of the Companies (Accounts) Rules, 2014 requires the board report of all companies to state the details in respect of adequacy of internal financial controls with reference to the financial statements.

The inclusion of the matters relating to internal financial controls in the directors responsibility statement is in addition to the requirement of the directors stating that they have taken proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of the 2013 Act for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities.
